PROFESSIONAL SUMMARY

Final-year BSc Mathematics & Computer Science student with proven experience as a Cyber Security Intelligence Analyst. Skilled in threat analysis, vulnerability assessment, incident response, and open-source intelligence (OSINT). Ranked #1 on TryHackMe in Lesotho and represented Africa at the International Cybersecurity Challenge (ICC) 2025 finals in Tokyo. Applies machine learning to security — anomaly detection on telemetry, threat prediction, and adversarial-ML awareness. Passionate about transforming raw security data into actionable intelligence and strengthening organisational cyber posture.

CURRENTLY LOOKING FOR

Open to junior penetration testing and SOC analyst roles where I can contribute to threat detection, vulnerability management, and incident response. Also available for contract CTF preparation, security tooling development, and adversarial-ML consulting. Immediately available — Lesotho-based, willing to relocate or work remotely.

CORE COMPETENCIES

Threat Intelligence	OSINT, threat hunting, IOC analysis, TTP mapping, intelligence reporting
Security Analysis	Log analysis, vulnerability assessment (CompTIA PenTest+), attack surface mapping
Incident Response	Detection, triage, containment coordination, post-incident analysis
ML for Security	Anomaly detection on telemetry, threat prediction & IOC clustering, adversarial-ML awareness (Stanford/DeepLearning.AI ML Specialization)
Technical	Windows/Linux, Active Directory, network traffic analysis, SIEM concepts, Python, Bash, PowerShell
Soft Skills	Analytical thinking, clear reporting, teamwork, adaptability, communication

EXPERIENCE

Cyber Security Analyst (Intern)
The Root Access Network (T.R.A.N)
Jun 2026 – Present

- Conducting penetration testing and vulnerability assessments on internal networks and web applications.
- Analysing security logs and alerts to identify potential threats and anomalies.
- Collaborating with team members to develop automated security scanning scripts.
- Documenting findings and presenting actionable recommendations to improve security posture.

Cyber Security Intelligence Analyst (Intern)
Ministry of Information, Communications, Science, Technology and Innovation (Lesotho)
June 2025 – August 2025

- Monitored internal systems for suspicious activity and performed initial threat analysis.
- Assisted in vulnerability assessments and produced intelligence briefs for infrastructure support teams.
- Logged and tracked security incidents, ensuring timely escalation and resolution.
- Contributed to security hardening of digital systems under the Infrastructure Support Services Office.

Competitor & CTF Analyst
African Region — International Cybersecurity Challenge (AFRICC)
August 2025 – Present

- Represented Team AFRICC at the ICC 2025 Finals (Tokyo, Japan).
- Competed in Jeopardy-style (7th globally) and Attack-&-Defense CTF — focused on threat intelligence, network forensics, and real-time adversary analysis.
- Demonstrated ability to analyse attack patterns and respond under pressure.

CTF Player & Security Analyst
TryHackMe — profile: 1amAizen (#1 All-Time, Lesotho)
January 2023 – August 2025

- #1 all-time ranked in Lesotho — consistently solving complex security challenges and developing threat analysis methodologies.
- Built a repeatable process for technical incident investigation, including log review, vulnerability identification, and root cause analysis.
- Mentored peers on cyber intelligence concepts and platform-related security issues.

KEY PROJECTS

Threat Intelligence Automation — Automated threat intel collection, enrichment, and IOC management pipeline with MITRE ATT&CK mapping.

Vulnerability Scanner Suite — Custom vulnerability assessment toolkit combining Nmap, Nuclei, and custom checks for internal network auditing.

OSINT Framework — Modular OSINT automation framework for reconnaissance, asset discovery, and attack surface mapping.

Incident Response Playbooks — Standardized incident response playbooks and automation scripts for containment, eradication, and recovery.

KEY ACHIEVEMENTS

- 1st Place Winner — Internet Society Cyber Security Hackathon (2024)
- 3rd Place Winner — Internet Society Cyber Security Hackathon (2025)
- Team Representative — International Cybersecurity Challenge (Tokyo, 2025) — 7th globally
- #1 All-Time Rank — TryHackMe Lesotho (2023 – present) — profile: 1amAizen

EDUCATION

Bachelor of Science in Mathematics and Computer Science (Final Year)
National University of Lesotho | August 2021 – expected August 2026
Relevant coursework: Computer Networks, Operating Systems, Database Management, Cybersecurity Fundamentals, System Administration.
Activities: Internet Society Cyber Security Hackathon, Robotics For Good Youth Challenge, CTF training.

CERTIFICATIONS

- CompTIA PenTest+ — TryHackMe (2025)
- Jr Penetration Tester — TryHackMe (2025)
- Machine Learning Specialization — Stanford University & DeepLearning.AI (2025)

VOLUNTEERING

Referee & Setup Team Member
AI for Good Challenge | March 2025 – April 2025

- Guided students in competition rules — sharpened communication and analytical explanation skills.
- Handled technical setup and troubleshooting — reinforced customer-facing problem solving.

ADDITIONAL INFORMATION

TryHackMe:	https://tryhackme.com/p/1amAizen (#1 Lesotho)
GitHub:	https://github.com/famed21

Languages:	English (fluent), Sesotho (fluent)
Citizenship:	Lesotho (immediate availability)
Technical proficiency:	Microsoft Office, Windows/Linux, Kali Linux, Python, ticketing systems, basic SIEM tools
